

Fire & Life Safety Solutions

Committed to keeping your building safe,
no matter what the future brings

usa.siemens.com/perfect-places-fire

A total fire and life safety provider with design, manufacturing, installation, service, and lifecycle management capabilities across all critical building systems. We seek to understand our customers' business challenges and goals and to apply our products and services in support of those goals. We focus on life safety, compliance, risk avoidance, cost reduction, and lifecycle management of assets.

Perfect places are safe places

A leader in technology and smart buildings, Siemens understands the critical role fire and life safety systems play in protecting people, property, and business continuity. You can trust us as your technology partner to:

- Help protect your facility with a complete portfolio of fire and life safety solutions
- Help ensure proper code compliance and ongoing performance through a tailored service program
- Assist in monitoring systems to deliver the correct response in an emergency

Designed for the life of your building

Our fire and life safety systems are designed to keep buildings safe over their entire lifecycle, from construction through changes and reconfigurations, modernizations, and expansions. Our building technology experts work closely with you to understand your business goals and design the right system and service program to maximize value and meet your needs today and into the future.

Safe and smart

We leverage the latest technology to add intelligence to building systems and increase safety. Our smart building open platform provides centralized command and control, connecting multiple building systems including third-party systems, seamlessly for greater efficiency and response. In the event of a fire it detects smoke, activates air dampers, communicates evacuation instructions, and provides first responders with critical information.

Siemens has the market expertise that enables us to create fire and life safety solutions that add maximum value through proven solutions for:

- Healthcare
- K-12
- Higher Education
- Commercial Office
- Data Centers
- Life Science
- Hospitality
- Oil & Gas
- Airports
- Manufacturing
- Federal, State & Local Governments

With fire and life safety solutions customized for your business needs and budget, you can turn to Siemens for our complete portfolio of innovative, intelligent technologies for the lifecycle of every facility.

Fire & Life Safety Solutions and Products

We offer a smart portfolio and then customize it to meet your needs and budget. Our solutions include:

- Fire detection and alarm
- Emergency voice
- Area of rescue
- Early warning fire detection
- Clean agent suppression
- Smoke control
- Emergency Responder Radio Coverage System

You can increase responsiveness with centralized command and control through our Desigo™ CC fire safety management station. It provides a graphical approach to manage and control all of your fire systems from a flexible, easy-to-use interface that enables fast response in an emergency.

Mass Emergency Communication

Reaching and accounting for people during a critical event can be difficult and stressful. Our mass notification solutions provide command and confidence in trying circumstances. Delivering customized messages through multiple modes of communication is critical in an emergency situation. Siemens mass notification ensures emergency messages are received by everyone no matter where they are.

Siemens is ready to help you understand and take action for the NFPA 3000™ standard for Active Shooter / Hostile Response. We're ready to work with you to evaluate your specific needs and how to prepare, respond, and recover from an emergency or hostile event.

Fire & Life Safety Services

Our comprehensive services can help maintain protection at the highest levels of service on a regular basis. We have the capabilities to test, inspect, and repair all of your fire and life safety systems. All work is done in accordance with NFPA® standards as well as state and local codes.

Consulting Specifying Engineer and Contractor Support

Great protection begins with the right partner. Our EngineeringAdvantage™ Program provides tools, resources, and support to reduce risks and deliver technical excellence, cost-effective solutions, application options, and on-time performance. Our SpecWriter™ tool, user-friendly and with custom-text capabilities, is the fastest and easiest way to create professional life safety systems specifications to help deliver projects on time and on budget.

Create your perfect place

Perfect places are protected places. Our entire Siemens team, from account managers to engineers to certified technicians, is committed to ensuring the safety of your facility and its occupants.
